

## ADAPTATIONS FOR WRITING: TEXT TO SPEECH

- For web sites and databases that do not provide listening capabilities, text can be copied and pasted into a variety of free text-to-speech generators. One example is Vozme. This site allows text to be listened to instantly or downloaded as an MP3.
- SpeakIt converts text into speech when you highlight a selected text and click the icon to begin listening. It can read text in 50 languages.
- The “Speak” command can be added to the Quick Access Toolbar in Word, Powerpoint, etc. Directions may be found:
